

CONFIDENTIAL RFP

Request for Proposal: Enterprise Document AI Solution

Issuing Organization: MediTech Solutions Inc.

Primary Contact: Dr. Michael Vance, Chief Medical Technology Officer

Industry: Healthcare Information Technology & Diagnostics

Date: September 2026

1. Executive Summary & Business Need

MediTech Solutions processes medical diagnostic records across 120 hospital networks. We are seeking an enterprise-grade AI-powered document processing solution capable of extracting information from approximately **10,000 PDF documents per month**.

2. Technical Requirements & Volume Specifications

Requirement Category	Specification Detail	Priority
Document Volume	Approximately 10,000 multi-page PDF documents monthly (approx. 330 docs/business day).	Must-Have
Data Extraction	High-accuracy OCR and table extraction (>99%) from lab reports, clinical summaries, and patient intake forms.	Must-Have
Security & Compliance	End-to-end HIPAA compliance, BAA agreement execution, zero data retention option, and SOC2 Type II certification.	Must-Have
System Integration	RESTful API with webhook triggers to push structured JSON directly into internal EHR database.	High
Target Timeline	Production rollout within 2 to 3 months.	High

Target Budget	Estimated annual operating budget between \$15,000 and \$30,000 per month.	Approved

3. Questions for Vendors

1. What are your guaranteed SLAs for 99.9% uptime and per-document processing latency?
2. How does your pipeline handle low-resolution scans and handwriting?
3. What is your pricing tier for 10,000 to 25,000 documents per month?
